

20/09/2011

The natural gas consumption in roll steel treatment pools is reduced to zero by TEV Total Energy Efficiency Co.Ltd. with TEV-KZ exhaust heat recovery system.

The natural gas consumption is reduced %10 . Washing water 's temperature is increased from 50°C to 65°C and prevented the formation of the legions.

We wish to thank the TEV's authorities for their contribution to joint projects.

Best Regards
Factory Manager
